

Camera Tools

This plugin allows you to align Editor view to Game's cameras and from Game camera to Editor view.

To align view **from Editor to Game** do next steps:

- Attach *Area730/CameraTools/CameraAlign.cs* to your target cameras
- Click View From Editor To Game (green button)

Now you can simple change scene view and your target camera in game will change position as well.

If you want to follow **Game camera to your Scene view** just click on View From Game To Editor (cyan button).

Note: If you run Application please press on button one more time.

If you have any questions please write to us: support@area730.com

Thanks for purchasing this plugin.
Regards Area730 team
